Location

Kalamata has one of the most beautiful coastal landscapes in Greece.

Located in the prefecture of Messinia, in the southern Peloponnese, the area is dominated by the Taygetos, a 100 km long mountain range reaching 2407m at its summit.

Sometimes gently, sometimes steeply, it slopes down to the Mediterranean Sea and has created a fascinating landscape full of variety and contrast.

Weather

Kalamata enjoys a typically Mediterranean climate, with hot dry summers and short wetter winters. At the beginning of the season, May temperatures are around 21C rising to 25C in June, and reaching 30C in July and August.

The months of September and October remain warm, and see 9 hours of sunshine each day, with more comfortable temperatures of between 22C – 27C.
